## CHAPTER 78

### LEAD AND ARTICLES THEREOF

XV  
78-1

#### Subheading Note

1. In this chapter the expression "refined lead" means:

Metal containing by weight at least 99.9 percent of lead, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

| Element |                        | Limiting content percent by weight |
|---------|------------------------|------------------------------------|
| Ag      | Silver                 | 0.02                               |
| As      | Arsenic                | 0.005                              |
| Bi      | Bismuth                | 0.05                               |
| Ca      | Calcium                | 0.002                              |
| Cd      | Cadmium                | 0.002                              |
| Cu      | Copper                 | 0.08                               |
| Fe      | Iron                   | 0.002                              |
| S       | Sulfur                 | 0.002                              |
| Sb      | Antimony               | 0.005                              |
| Sn      | Tin                    | 0.005                              |
| Zn      | Zinc                   | 0.002                              |
| Other   | (for example Te), each | 0.001                              |

#### Statistical Note

1. For the purposes of this chapter, "alloys of lead" are metals in which the lead content is, by weight, less than 99 percent, but not less than any other metallic element.
